USE AND CARE GUIDE INFORMATION

- Before selecting the surface material, consider the type of use it will receive, as well as its texture, color, and reflective value.
- Use cutting boards, chopping blocks or other protective surfaces.
- Do not use abrasive cleaners, steel wool, sandpaper, or Scotch-Brite scouring pads.
- Do not use it as an iron board.
- Avoid sliding heavy or abrasive object across the laminate.
- Prolonged exposure to temperature above 60 degree C may cause the laminate to decolorise and damage the surface.

CLEANING INFORMATION

- In most cases, you only need to use a clean, damp, non abrasive cotton cloth and a mild liquid detergent or household cleaner.
- Rinse and dry the surface with a soft, clean, non abrasive cotton cloth.
- Do not flood the laminate, especially near seams, since water can penetrate and cause the substrate to swell.
- It is advisable to use a trivet or insulated device beneath all the cookware.
- Do not use thinner and toluene for cleaning to avoid damaging the egdeband. Hexane, alcohol and white kerosene is recommended.
- For specific type of surfaces, use a nylon bristled hand or vegetable brush, along with a mild liquid detergent and water solution or household cleaner. Clean the area using a rotation motion.
- Never use cleaners containing acid, alkali, or sodium hypochlorite. Make sure bottles, rags, and other materials contaminated with these cleaners never contact the laminate surface.

TECHNICAL SPECIFICATION
